

Cold Rolled Steel Sections & Profiles

Robust design ensures our systems provide dependable long-term performance and reliability in the most demanding operating environments for the application of variable product information such as; Product, date, time & shift codes, dimensions, specification, order number, CE & BS EN marking, colour ID, as well as industry and company logos.

Typical applications include the marking of;

- Stud
- Purlins
- Bars
- Track
- Tubes
- Flat sheet
- Expanded metal panels
- Cable management
- Corrugated sheet

One Supplier - One Source - One Partner

Features and benefits of the range include;

- The application of **small & large character print formats** including **single or multiple lines of print**, all from the same system, providing **total flexibility for marking varying product dimensions**
- **High print speeds** across all fonts with **no depreciation on character height**
- Print heads can be **mounted in any orientation** and the position adjusted **without incurring downtime** for cleaning, re-priming or re-aligning jets
- A range of **ink colours** meets industry requirements to **identify product gauge**
- The facility to operate **single or multiple print heads from one controller** for applications over one or more production lines **reduces investment costs**
- **Compact modular design** provides **flexibility** on installation, ensuring **easy integration** at the production line
- **User friendly & uncomplicated design** **minimises maintenance** requirements, enhancing **sustainability at site level**
- **Excellent throw distance** ensures **high print quality** is achieved without having to position the head within close proximity of the product
- Operate as **stand-alone** or **networked** to a PC, PLC or ERP/WMS system to manage the marking process, **increasing uptime** and **eliminating operator error**
- **Plug-in functionality** means customising the system to meet the specific requirements of your **operation is made easy**, and **cost effective**. Also offering the facility to **replace existing printing equipment without having to re-write software** on the mill.

With over **30 years industry experience**, and as a **leading supplier to manufacturers of construction products** we have established long-term relationships based on the **reliability and flexibility** of our systems, as well as our **after sales service and support**.
