ONE SUPPLIER - ONE SOURCE - ONE PARTNER

FEATURES AND BENEFITS OF THE RANGE INCLUDE;

- The flexibility to operate single or multiple print heads and marking technologies from one controller for applications over one or more production lines helps to standardise on equipment reducing hardware at the line and lowering investment costs
- Apply small & large character print formats to suit varying product dimensions
- Systems can operate as stand alone or networked to a PC or PLC, including the facility for seamless integration with other production line equipment, as well as ERP/WMS systems to increase uptime and eliminate operator errors
- Print heads can be mounted in any orientation and the position adjusted without incurring downtime for cleaning, re priming or re aligning jets
- High print speeds
- Extensive range of ink types and colours
- Compact modular design provides flexibility on installation ensuring easy integration at the production line
- User friendly & uncomplicated design minimises maintenance requirements, enhancing sustainability at site level
- Excellent throw distance ensures high print quality can be achieved without having to position the head within close proximity of the product
- Plug in functionality means customising the system to meet the specific requirements of your operation is made easy, and cost effective

With over **40 years industry experience**, and as a leading supplier to operations within harsh production environments we have established long-term relationships based on the reliability and flexibility of our systems, as well as our after sales service and support.

For more information on our range of solutions, an evaluation of your own product marking requirements, print samples or on-site demonstration, please contact one of the team.
