

**Robust design ensures our systems provide dependable long-term performance and reliability in demanding operating environments for the application of high contrast variable product information.**

We provide a unique large character inkjet printing system developed specifically for applications to uncured rubber, with fast-dry HAP's free curable inks designed to withstand the curing process and eliminating transfer or shadowing in the mould.

Our exclusive 8000+ Maxi valve-jet print head technology, the most reliable drop-on-demand system in the industry, offers proven reliability (6 billion cycles before re-tuning), easy maintenance and low operating costs.

With a choice of controllers, the system provides unrivalled flexibility and scalability to not only meet current mark requirements but to grow with your business, making your purchase investment secure.

**ONE SUPPLIER - ONE SOURCE - ONE PARTNER**

### FEATURES AND BENEFITS OF THE RANGE INCLUDE;

- Non-contact system eliminates damage to the compound
- Automated code changes eliminate tread code errors and downtime for product/recipe changeovers
- Apply real time information, including variable text, graphics, barcodes and 2D codes
- Small & large character printing with the facility to apply single or multiple lines of information, as well the flexibility to operate multiple print heads from one controller over one or more production lines
- Auto-flushing and cleaning
- Large capacity ink delivery system reduces ink changeovers
- Operate stand-alone or networked to a PC or PLC, including the facility for seamless integration with automation functions, as well as ERP/WMS systems and databases
- User friendly & uncomplicated design minimises maintenance requirements ensuring sustainability at site level

With over **40 years industry experience**, and as a leading supplier to operations within harsh production environments we have established long-term relationships based on the reliability and flexibility of our systems, as well as our after sales service and support.

For more information on our range of solutions, an evaluation of your own product marking requirements, print samples or on-site demonstration, please contact one of the team.
