

Robust design ensures our systems provide dependable long-term performance and reliability in the most demanding production environments.

With the flexibility to meet all end-of-line product coding requirements, our solutions range from the application of basic product traceability in the form of a simple date code to high-resolution print formats incorporating barcodes, logos and graphics.

Our range includes options for Piezo, TIJ, CIJ and Valve-Jet printing technologies to suit the individual requirements of the product, production environment and substrate, and are equally suited to high volume 24/7 operations as well as short or intermittent production runs.

The increasing demand for corporate branding to work in conjunction with the application of general product information as a more cost effective and flexible solution to pre-printed cases or labels is met by our **MPERIA** operating system and range of T and L series print heads.

MPERIA makes message programming simple and helps manage multiple production lines, print heads and technologies from a single interface.

The flexibility to control one or multiple print heads and technologies from a single operating system also helps to standardise on equipment, reducing hardware at the line as well as the cost of implementation and on-going support.

ONE SUPPLIER - ONE SOURCE - ONE PARTNER

FEATURES AND BENEFITS OF THE RANGE INCLUDE;

- **Small & large character printing** with a choice of systems to meet basic product coding requirements through to applications demanding high resolution print formats (including Windows TrueType fonts), graphics, logos and barcodes
- Operate **single or multiple heads from one controller** for applications over one or more production lines
- **Compact modular design** provides flexibility on installation ensuring easy integration at the production line, with plug'n'play connections for quick changeovers
- Systems can operate as both **stand-alone** or as part of a **network** solution connected to a PC, PLC or other production line equipment. Effortless integration with ERP/MRP and WMS systems is also a feature of our **MPERIA** operating system
- User-friendly & uncompleted design **minimises maintenance requirements** ensuring **sustainability at site level**
- A range of user and **environmentally friendly** inks with options for **non-pressurised** ink delivery systems

With over **40 years industry experience**, and as a leading supplier to operations within harsh production environments we have established long-term relationships based on the reliability and flexibility of our systems, as well as our after sales service and support.

For more information on our range of solutions, an evaluation of your own product marking requirements, print samples or on-site demonstration, please contact one of the team.
